Experience

Frontend Developer Internship   Nov 2022 - Current
Frontend Simplified

- Transformed a completely static HTML, CSS, JavaScript and React single page application into an interactive user interface using animations, transitions and carousels
- Processed API requests with Axios to dynamically represent data from a cloud server and represented it through skeleton loading states, pagination and dynamic routing
- Utilized Git version control and the GitHub interface to work and thrive in a virtual and collaborative team environment

Freelance Frontend Developer   Dec 2022 - Current
Self Employed

- Delivered 3 professional websites using HTML5, CSS3 (+ SCSS, BEM), JavaScript, React, WordPress best practices
- Improved website performance by compressing, caching and lazy loading images and components
- Included SEO, responsive, multi-platform and hosting support, enabling their website to be used by any browser or device in the world

Projects

Personal Website | [Website](#) | [GitHub](#)
- My personal website highlights my programming skills and also contains the source code and website links for all my projects listed below.

CrLibrary | [Website](#) | [GitHub](#)
- Created a fully responsive e-commerce application called "CrLibrary", built with React.js, JavaScript, CSS and HTML
- Project includes dynamic routing and skeleton loading states, it was designed with best practices and engaging user experience in mind.

CREats | [Website](#) | [GitHub](#)
- Developed a basic e-commerce app called "CREats" with Angular, Typescript, CSS and HTML. The page is fully responsive and has a mobile-first design in mind, currently working on making the design more appealing.
- Project includes a clean and easy to use user interface, dynamic routing, a shopping cart system and multiple error-handling pages to give a friendly user interface.
